

Year 2 Homework – 5th May

Well done for all your hard work this week with your 'special booklets'. Be proud.
You have all tried your very best.

For homework, I would like you to have a bit of a rest from all your calculations, reading and SPaG work! Instead, I would like you to be creative!

In Science, we are learning about animals and their habitats. I would like you to create a 'shoebox habitat'. Think carefully about the animals that you will need to show in your habitat and what kind of habitat they live in. What do they need to survive?

Here are some examples to help you with your ideas.

Habitats ideas:

- The Arctic
- A rainforest
- A forest
- A jungle
- The desert
- Under the Sea

Or another!

You could, of course, choose to make a microhabitat – such as showing what lives under leaves, a log etc. This would show lots of 'minibeasts'.

Please do not feel as if you have to use a shoebox. As long as you create a wonderful habitat, I don't mind how you do it! Have fun ☺

You have two weeks to complete this project. All 'habitats' must be brought into school by

Wednesday 17th May.
