Linnaeus System

Kingdom
Phylum
Class
Order
Family
Genus
Species

Why Used?:

Scientists use the Linnaeus System to classify ~~animals~~ all living things. Scientists from all over the world can understand Linnaeus' system. The Latin name is made from the Genus and Species.

Sea Dragon

Kingdom: Animalia
Phylum: Chordata
Class: Actinopterygii
Order: Syngnathiformes
Family: Syngnathidae
Genus: Phycodurus
Latin Name: Phycodurus

Komodo Dragon

Kingdom: Animalia
Phylum: ~~Chordata~~ Chordata
Class: Reptilia
Order: Squamata
Family: Varanidae
Genus: Varanus
Latin Name: Varanus komodoensis

Kingdoms

There are five kingdoms, they are:

Animalia (the animals)
Fungi (fungus and mushrooms)
Plantae (the plants)

Monera (~~Plant~~ (bacteria))
Protista (More than one cell)
