

Creation poem

Write an acrostic poem about 'Creation'.

An acrostic poem uses the letters of a word to form the first letter of each line in the poem.

For the word "CREATION", the first line of the poem will begin with "C". The second line will begin with "R". This continues all the way down to the last line which will begin with "N".

When writing your poem, try to think about what 'Creation' means to you.

Your name <i>Amber</i>
C reating the world in seven days.
R ocks were revealed and Earth was visible.
E ntire species were made.
A bove in the sky birds fly high.
T rees and plants and living things were all created by God.
I n the sea fish swim.
O n the seventh day God's work was done.
N ight and day are still here today.

Oh my Amber . . . this is amazing! mb.
